SUMMARY

Full Stack Developer with 7+ years of experience building scalable web and mobile applications across diverse industries. Proficient in JavaScript, PHP, Go, and Dart, with hands-on experience in modern frameworks such as Laravel, CodeIgniter, Gin, Flutter, and React/Next.js.

Experienced in designing and developing RESTful APIs, microservices architectures, and real-time systems, with strong focus on performance, maintainability, and reliability. Comfortable working across the full development lifecycle, from requirement analysis to deployment and production support.

Adaptable and fast learner with a strong problem-solving mindset, capable of working independently or collaboratively to deliver high-quality software solutions.

EXPERIENCE

Full Stack Web Developer

04/2025 - 03/2026

CV Jadi Teknologi Utama

- Developed and maintained Ixtask Management System, a web-based task management application to streamline internal business processes.
- Built backend features using CodeIgniter 3 with MySQL for data management and business logic.
- Developed interactive user interfaces using Bootstrap and jQuery to enhance usability and responsiveness.
- Performed bug fixing, feature enhancements, and system optimization for better performance and stability.

Full Stack Developer

03/2023 - 04/2025

PT Tristar Surya Gemilang ↗

- Developed SISAPPRA (Sistem Informasi Satuan Polisi Pamong Praja DKI Jakarta) using microservices architecture with Go (Gin, Gorm), PostgreSQL, MongoDB, and Redis, improving system scalability and performance.
- Implemented secure and well-documented REST APIs using JWT authentication and Swagger.
- Built modern frontend applications using Next.js, Redux, and React Query to enhance user experience and data handling efficiency.
- Rebuilt Loan Management System for Bank BJB into a scalable Next.js-based application, improving maintainability and UI/UX with component-based design (Mantine UI).

Freelance Full Stack Developer

03/2018 - Present

Self-employed

- Delivered multiple web-based systems (e-point, inventory, and others) using Golang, NextJS, CodeIgniter 3, Laravel, jQuery, MySQL, and PostgreSQL, tailored to diverse client needs.
- Developed E-K2PC mobile application for Puskesmas Cirinten using Flutter with SQLite for efficient local data handling.
- Built and customized company profile websites using Webflow for international clients, focusing on modern design, responsiveness, and performance.
- Managed end-to-end development lifecycle, ensuring scalable, reliable, and user-friendly solutions.

Full Stack Web Developer

05/2018 - 02/2023

PT. Digital Apta Media ↗

- Developed and maintained web-based applications (Icecreamstore, Ticketing, Digital Signage, VOIP) using CodeIgniter 3, MySQL, PostgreSQL, GraphQL, MongoDB, jQuery, and Bootstrap, ensuring scalable and reliable systems.
- Built and supported IPTV applications (Aptavis) on Tizen OS and WebOS, maintaining stability across smart device platforms.
- Designed and integrated REST APIs, WebSocket, and Webhooks to enable real-time communication and seamless system integration.
- Managed production deployments and live system troubleshooting, ensuring high availability and performance.
- Collaborated with cross-functional teams to maintain code quality and smooth release cycles.

Internship

01/2017 - 04/2017

Codepolitan

- Write articles about programming.
- Developed web-based applications for final projects using CodeIgniter 3 with MySQL.

EDUCATION

Informatics Engineering

08/2019 - 03/2024

Universitas Sangga Buana YPKP Bandung - Bachelor's Degree

Software Engineering

05/2015 - 01/2018

SMK Negeri 1 Banjar - Vocational High School / Diploma Degree

CERTIFICATES

Go-Lang Modules ↗

03/2024 - 03/2027

CODEPOLITAN

Go-Lang Standard Library ↗

03/2024 - 03/2027

CODEPOLITAN

Go-Lang Dasar ↗

01/2024 - 01/2027

CODEPOLITAN

SKILLS

Backend: Go (Gin, GORM), PHP (Laravel, CodeIgniter),
REST API, Microservices, JWT.

Frontend: Next.js, Redux, React Query, jQuery, Bootstrap,
HTML, CSS.

Mobile: Flutter, React Native.

Database: PostgreSQL, MySQL, MongoDB, Redis, SQLite.

Tools & Others: Git, Swagger, Postman, WebSocket,
Webhooks.
